

IN THE CLAIMS

The following is a listing of the claims in the present application with claim 1 shown as amended and with claims 2, 4 and 6 shown as canceled.

LISTING OF CLAIMS:

1. (Currently Amended): A viscous and glassy composition for oral administration comprising itraconazole; an acidifying agent selected from the group consisting of phosphoric acid, hydrochloric acid and an aqueous solution thereof; an amphiphilic additive; a surfactant; and an oil, wherein the composition has self-microemulsifying capability to form microemulsion in the body fluid when orally administered, and the itraconazole bioavailability ratio of the composition before and after food ingestion is 0.8 or higher.

2. (Cancelled).

3. (Original): The composition of claim 1, wherein the viscosity measured at 25 °C is at least 10,000 cps.

4. (Cancelled).

5. (Previously Presented): The composition of claim 1, wherein the itraconazole : acidifying agent : amphiphilic additive : surfactant : oil ratio by weight is in the range of 1 : 0.5~15 : 0.5~20 : 0.5~15 : 0.5~15.

6. (Cancelled).

7. (Original): The composition of claim 1, wherein the amphiphilic is selected from the group consisting of transcitol, dimethyl isosorbide, glycofurol, propylene glycol, propylene carbonate, solutol and a mixture thereof.

8. (Previously Presented): The composition of claim 1, wherein the surfactant is selected from the group consisting of polyoxyethylene glycolated natural or hydrogenated vegetable oils, polyoxyethylene-sorbitan-fatty acid esters, polyoxyethylene fatty acid esters and a mixture thereof.

9. (Previously Presented): The composition of claim 1, wherein the oil is selected from the group consisting of tocopherol, a derivative thereof, and a mixture thereof.

10-11. (Cancelled).

12. (Previously Presented): The composition of claim 1, which is prepared by (a) dissolving itraconazole uniformly in a mixture of the acidifying agent, the amphiphilic additive and a volatile solvent, (b) further dissolving the surfactant and the oil in the resulting solution, and (c) removing the volatile solvent therefrom.

13. (Previously Presented): The composition of claim 12, wherein the volatile solvent is a C₂ or C₃ alcohol.
